PROFESSIONAL SUMMARY

Information Technology student with foundational knowledge of web development, programming, database management, and system development. Academic project experience includes a web-based barangay services system and an IT helpdesk ticketing system. Interested in applying technical knowledge and developing problem-solving skills in an entry-level IT support or software development role.

TECHNICAL SKILLS

Web Development: PHP, web development fundamentals
Database Management: MySQL, database organization, data handling
Programming: Java, programming logic, basic debugging
System Development: Web-based systems, ticket management concepts
User Interface Design: Basic UI design and usability
IT Support: Basic computer troubleshooting and technical problem-solving

PROJECTS

Barangay Villasis E-Barangay Services | Academic Project
Developed a web-based system concept to support barangay services and online access for residents.
Included an administrative panel for staff to manage service-related activities.
Applied PHP, MySQL, and web development concepts in the project.
Technologies: PHP, MySQL, Web Development

IT Helpdesk Ticketing System | Academic Project
Designed a ticketing system concept that lets users report IT-related issues.
Provided a way for administrators to monitor reported issues and track their resolution.
Applied database management and user interface design concepts to support issue tracking.
Technologies: Java, MySQL, UI Design

EDUCATION

Bachelor of Science in Information Technology (BSIT)
Northeastern College — Santiago City, Isabela | 2024–Present
Relevant Coursework: Web Development, Database Management, Object-Oriented Programming, Data Structures and Algorithms, Platform Technologies

CORE COMPETENCIES

Problem-Solving | Analytical Thinking | Attention to Detail | Adaptability | Teamwork | Time Management | Communication | Continuous Learning
